Required Documents for Septic Permit Applications

New Septic Application:

- Septic application (current version, complete, signed)
- Deed or survey of property (see below for lots in subdivisions)
- Floorplan (dimension must be legible)
- Agent Authorization (required if property owner is not signing application- not required for septic contractors acting as agent)
- Site plan (must be to scale and show all features required by 62-6 FAC, see below for site plan comments)
- Site Evaluation (must be completed by private evaluator at this time, See Below)

Repair Septic Application:

- Septic application (current version, complete, signed)
- Pump out form (required if existing tank or DF is to be used. Contractor may pump tank prior to abandoning but CHD must obtain pump out form during time of inspection to confirm existing tank was pumped prior to abandonment.)
- Agent Authorization (required if property owner is not signing application- not required for septic contractors acting as agent)
- Site plan (not required to be scaled however must still show all features required by 62-6 FAC)
- Site Evaluation (must be completed by private evaluator at this time, See Below)

Existing Septic Application:

- Septic application (current version, complete, signed, must indicate what is "proposed" and what is "existing" on property. If applicant doesn't know what was existing, they will need tank pumped and DF amount determined so CHD can estimate GPD for septic system.
- Floor plan (dimension must be legible)
- Deed or survey of property (see below for lots in subdivisions)
- Agent Authorization (required if property owner is not signing application- not required for septic contractors acting as agent)
- Site plan (must be to scale and show all features required by 62-6 FAC, see below for site plan comments)

Existing Modification Application:

- Septic application (current version, complete, signed, must indicate what is "proposed" and what is "existing" on property)
- Deed or survey of property
- Pump out Form
- Agent Authorization (required if property owner is not signing application- not required for septic contractors acting as agent)
- Site plan (must be to scale and show all features required by 62-6, see below for site plan comments)
- Site Evaluation (must be completed by private evaluator).
